"DAHLIATOWN"
ON . . . THE
CAPE ROAD
MIDDLEBORO, MASS.

MY CUSTOMERS may be interested to know that I am prepared to give service seven days each week and as late as nine o'clock each evening. I have found that evenings, Saturday afternoons, and Sundays are the only times convenient for many of you to visit my gardens. You can depend that you and your friends are always welcome and that I shall strive to make your visit to "Dahliatown" as pleasant as possible.

Announcing My New Farm

Having acquired another farm in South Middleboro, I will be better equipped than ever before to serve my large increasing trade. My new farm has in the neighborhood of one hundred acres, and is located on both sides of the State Road, route 28, about four miles south of Middleboro. A large advertising sign tells you that you are "Now at Dahliatown's New Location." I already have about fifty acres of it ploughed, and plan to plant that much next Spring, in addition to my present farm. This will give me considerably over one hundred acres under cultivation. I shall construct this Spring, as soon as the frost is out of the ground, a Flower Shop at my new farm. This Flower Shop will be three times the size of my present Flower Shop, having a special room for the displaying of all varieties of dahlias, gladioli and other bulbs and hardy plants that I am growing. I am sure you will find it very interesting to visit and that it will be well worth your while.

"Dahliatown" has grown rapidly this past year, both in acreage and improvements. Thinking you would be interested to know how I am progressing, I will mention a few of my most important accomplishments. In addition to the forty-six acres of my own land, I had about fifteen acres of hired or leased land under cultivation, making my total acreage over sixty, principally to bulbs.

My Gladioli planting was considerably increased, totaling approximately seven hundred thousand large sized bulbs, with considerably over two million smaller bulbs. My Peony planting was nearly doubled to meet my increasing business in Peonies, with six new Japanese varieties added. My business in Dutch Bulbs (Tulips, Hyacinths, Crocus, etc.) easily tripled that of last Fall, which is very gratifying. My second year in offering Flower and Vegetable Seeds was mighty good. Realizing the importance of dependable seeds, I have been exceptionally careful in my selection — that this new feature may develop rapidly.

To accommodate the tremendous increase in my business I have been obliged to add a third floor to my bulb warehouse, giving me 4,320 sq. ft. of floor space. With the installation last Fall, of a new heating plant, I have added 14,000 cu. ft. of cellar storage space for bulbs. By developing my auto drives I have improved them so that you can ride for over a mile in the Fall, with flowers on both sides. You are most cordially invited to visit my gardens whenever you are in this locality and I assure you that I will strive to make your visit as pleasant as possible. Come and bring your friends — the more the merrier. My gardens are located on the State Road from Boston to Cape Cod, between the towns of Bridgewater and Middleboro. Don't forget that cut-flowers may be enjoyed from May until frost.

In all bulbs and seeds I am very careful that only the most desirable varieties are offered and that they are strong, healthy and full of vitality. My seeds all pass highest germination tests. Bulbs and Seeds of highest quality are my standard. Many new varieties have been tried, tested-out and finally discarded, and while this takes time and money, I find it pays me, as I can truthfully recommend everything I am offering. They include the very finest new creations and the cream of the older favorites.

I shall strive to continue my policy of conscientious service and hope to receive your order again this coming season. You can depend upon careful personal attention which I feel sure will give you complete satisfaction. Soliciting a share of your patronage, I remain,

Yours for floral success,

J. HERBERT ALEXANDER

GLADIOLI

During these last few years I have increased my Gladioli planting so rapidly that I now have one of the finest collections of Gladioli in the world, as well as one of the most extensive plantings. My collection includes the very latest and best, the finest new creations, all the very largest of recent production, as well as the cream of the older favorites. By devoting my entire time to growing bulbs, and studying their requirements carefully since childhood, I have acquired valuable knowledge on the production of bulbs. The combination of the practical knowledge gained thru years of experience, and the course in scientific horticulture at the University, plus a trained ability to select characteristics that show improvement, has made it possible to apply myself to bulb production, to the advantage of both my customers and myself.

A thorough understanding of fertilization and soil requirements has been a great help, and insures my customers that the bulbs I send to them are the best bulbs that can be produced. They are strong, healthy and full of vitality, plump high crowned corms (bulbs) that have considerable stored up food. I am constantly aiming to produce the best that can be developed in bulbs, and my prices are as low as is consistent with this quality bulb. All prices on Gladioli quoted are for mammoth sized bulbs, unless otherwise specified, and as these are larger and stronger than offered by many growers they are guaranteed to give excellent results. The medium sized bulbs quoted in many instances are the same size as offered as the largest size by many growers. All of both medium sized and mammoth bulbs are sure to bloom the first year. Any Gladioli bulb that fails to grow will be cheerfully replaced without expense to you. I make this guarantee because I am sure of the quality I can supply, and from past experiences know they give perfect satisfaction practically 100%. If you have never grown my Gladioli, a trial order will prove my statements convincingly, I assure you.

Emperor, The. An exceptional decorative dahlia; its enormous size, its beautiful deep color; its perfectly formed flower and its extra long stem, make this a magnificent prize winner of highest quality. The flower is made up of long, flat, purplish-maroon petals — the color is so intense that it does not spot under any weather conditions. \$1.00 each, 6 for \$5.00.

Judge Marean. A glowing salmon-pink, with a touch of watermelon-red, exquisitely blending to iridescent orange, yellow, and pure gold. Excellent stems. \$1.00 each, 3 for \$2.75.

Mrs. Harry T. Wright. One of the very finest dahlias on the market, and unquestionably my finest seedling. It is named expressly for and with permission of Mrs. Harry Temple Wright of Rockland, Mass., an enthusiastic lover of flowers. With blossoms of gigantic size, produced on exceptionally long, stiff stems, it holds a supreme place in the dahlia-world. A Decorative dahlia with blends of favorite autumn shades — a golden apricot-buff. Worthy of a place in the most exclusive garden. \$1.00 each.

Mrs. John L. Emerson. A favorite garden and exhibition Dahlia that will produce six to eight inch flowers throughout the season. In color, a beautiful golden-yellow overlaid carmine-red. One of the largest and most attractive Decorative dahlias grown. Very long, curling, pointed petals make it a pleasing cut-flower dahlia. \$2.00 each, 3 for \$5.00.

Paul Michael or California Gold.

A Decorative dahlia of the soft, fluffy type. Can be grown to majestic size for exhibition, if shaded a week before showing. This variety is one of the largest and most beautiful and it is a pleasure to recommend it. Twice it has been awarded a prize for the largest dahlia in California shows. In color a rich pure gold, or deep orange buff. An early, continuous and abundant bloomer. Flowers are produced on strong plants of medium

height. Ideal for garden or exhibition. \$1.00 each, 3 for \$2.75, 6 for \$5.00, \$10.00 per dozen.

Radio. Decorative. This phenomenal dahlia will produce flowers of greater size than any other dahlia I have grown; grown ordinarily (without forcing, etc.), it produces flowers eight to ten inches in diameter. In addition to its gigantic size, it is a continuous bloomer, producing its magnificent flowers on strong stiff stems. In color, a most attractive combination of deep "American Beauty" red blending to yellow at center, with tips of gold. It makes a very sturdy and vigorous plant and one that I can recommend to the most critical enthusiast. \$2.00 each.

PEONIES

The Peonies are among the noblest and most magnificent of our herbaceous plants. They are the "Queen of Spring Flowers," and are well adapted for massing in beds, and particularly valuable for planting in groups throughout the perennial or shrubbery border, where their brilliant hues add beauty to the entire surroundings. Their requirements are so simple — a good rich, deep soil; they are perfectly hardy, and produce their wealth of flowers in great abundance.

Time to Plant. Peonies may be planted with perfect safety any time from the middle of August till the ground freezes in the Fall, and in the early Spring until growth has advanced too far. September and October even as late as the ground is kept open is the best time, as they then make a root growth before Winter sets in, usually blooming the following Spring.

After being transplanted, Peonies will not produce typical blooms the first season, many fine double varieties throwing single or semi-double flowers, and it is not until the third year that the finest blooms are produced.

They will abundantly repay good care and nourishment; but they resent an over abundance of fresh manure too near the roots. Well decayed manure is far better. A division of the clumps at long intervals, when they become so crowded as to interfere with freedom of bloom; and the soil kept loose and free from weeds, is all that is necessary. Where grown for cut flowers, they should not be disturbed oftener than is necessary; where they are grown for the sale of roots, they may be divided every second or third year. Plant so the eyes will be from two to three inches below the surface. Lay roots flat. Do not stand them on ends.

RARE JAPANESE PEONIES

These "Wonderful Glowing Suns" as they are termed are entirely distinct from any other type of Peonies, resembling the Single Peonies, but with an additional development making the stamens either crowned with gold, or transforming them into more elongated petaloids of the same color as the outer single petals, tipped gold. They are as yet comparatively little known, mostly found in collections of connoisseurs, where they awaken the admiration of all who see them for the first time.

The foliage is a beautiful, glaucous blue; stems woody, and when covered with their heads of pink blossoms make a picture not to be forgotten. We supply pot plants only, as field plants are hard to establish.

They are almost shrubby in habit, and are improved by a slight cutting back after blooming. Stony, sandy loam is suitable for them and a warm, sunny position.

Persicum. Strong, twiggy bushes, covered with long, slender spikes of rosy pink flowers. One of our best rock plants. 9 inches. June-July. 3 for \$2.00, 6 for \$3.75.

SWEET PEAS

For best results the soil should be thoroughly and deeply dug over, a good liberal application of well-rotted manure worked-in, and the seeds planted six inches deep. Cover two inches at time of planting and fill in the balance as the vines grow. They enjoy plenty of water and manure, and require frequent cultivation. Plant seeds one to two inches apart. They should be supported. I offer the cream of the Spencer varieties — the Spencer's are the Aristocrats of the Sweet-Pea family.

A Cordial Invitation

to visit my gardens, whenever you have the opportunity, is extended to you. You are invited to come, and bring your friends, — the more the merrier. I assure you I will strive to make your visit as pleasant as possible, and that I will show you over my entire farm.

My gardens are located on the State Road from Boston to Cape Cod, between the towns of Bridgewater and Middleboro, five miles south of Bridgewater.

You will be able to enjoy over seventy-five acres of dahlias, which are in bloom from late July until frost, and are usually at their best during late August. Thousands of Gladioli, bordering the State Road near my new roadside-stand, will interest you, I am sure. My planting of them for 1931 will be considerably increased. For an early Spring attraction, I will have two acres of Tulips, which for this part of the country, will be a very unusual sight. The Darwin Tulips, which are the "Aristocrats of Tulipdom," will be at their best just before Decoration Day.

A half-mile auto drive thru my garden, with flowers on both sides, which was completed this past year will make it convenient for you to drive among my "Aristocrats of the Dahlia-World."

A large advertising sign at the corner, which says, "You are now in Dahliatown" will help you to locate my gardens. You are welcome at all times.
